PROJECTS

Browser Go GitHub-API | GitHub-Frontend | Application *(Personal Concept Project) October 2019*
- Built fullstack proof-of-concept for a gaming application that allows users to play the boardgame Go against other users
- Utilized Flask/PostgreSQL backend and React single-page frontend with Socket.io for realtime updates in game state
- Refactored JavaScript frontend to React from previous project: GitHub | Application
- Successfully completed proof of concept in one and a half weeks

A Stardust Truce GitHub | Application *(Personal Team Concept Project) September 2019*
- Built fullstack CRUD application for users to learn about and instantiate data structures in JavaScript and Python3
- Acted as database manager, designing SQL models and creating functionality to serve dynamically created JavaScript and Python3 files for download
- Successfully completed MVP in one week
